

Thought Starters for your project: ART HANGING

When deciding which Arakawa products will work best for your art hanging project, consider these questions before settling on a part or calling to collaborate with one of our knowledgeable project specialists.

- 1. What is the weight of the heaviest piece of artwork you want to hang?**
 - This will determine what size of cable and appropriate hardware that you need to use.
- 2. Will any of your pieces of art be sharing cables?**
 - Will your configuration include multiple pieces stacked on top of each other vertically? This will change the amount of weight those particular cables support.
- 3. Do you want to use railing? Wall railing or ceiling railing?**
 - Fixed wall and ceiling attachment parts are available, but railing is the most popular choice because it allows for the most flexibility.
- 4. Is the artwork you want to hang framed or unframed?**
 - If hanging unframed artwork, you probably need to use a gripper to grip to the edges of the piece (and only certain grippers can hang unframed glass).
 - If hanging framed artwork, chances are you will use a hook to connect to the picture framing wire on the back of the frame.
- 5. Do you want to connect to the floor or use floor weights?**
 - In some cases, tensioners and floor attachments may help provide better stability.

Parts I am considering for my art hanging project:

- Cable Diameter (based on weight of my heaviest piece of art): _____
- Railings: _____
- Rail Clips (if applicable): _____
- Midway Grippers & Attachments: _____
- Floor Attachments & Tensioners (if applicable): _____
